

Structural Grating

DeckTurf™. By Eco Arbor Designs

Fiberglass reinforced plastic (FRP) structural grating supporting artificial turf on an elevated pedestal system.

Structural Fiberglass grating allows you to install any type of material over pedestals on any roof deck. Natural stone, artificial turf or any other type of flooring can be installed over the grating.

Our panels are manufactured specifically for installing your product of choice over your roof deck or patio area. With a sanded grip surface the grating will hold any type of natural stone or tile as well as artificial turf.

Create an area of turf around or adjacent to our porcelain pavers or wood pavers. FRP grating and artificial turf is a perfect compliment for our paver and pedestal decking.

Available in 4'x8' sizes for maximum strength and large format sizing. Easy to cut radius edges or fitting into angled areas.

Create a level elevated roof top decking with lightweight FRP paneling.

Specifications

| | |
|----------------------------|-------------------------------------------|
| 1" Deep X 1 ½" X 1 ½" Mesh | ¾" X ¾" Top Mesh with sanded grip surface |
|----------------------------|-------------------------------------------|

| | |
|------------------------------------------------|-------------------------------------------------|
| Corrosion Resistant | Mold Resistant |
| 48 X 96" panels for easy radius cutting | Load Bar Centers 1 1/2" - Load Bar width 1/4" |
| # of Load Bars/Ft. of Width 8 | Open Area 44 % |
| Approximate Weight 19 lbs/grate (2.5 lbs/sqft) | Approximate Weight 70 lbs/grate (2.18 lbs/sqft) |
