

ECO DECK DeckTurf™

A fiberglass grating and artificial turf solution for roof decks and balconies.

Deck Turf was designed to create a reinforced structural grating system to accommodate any type of artificial turf over pedestals. Our fiberglass grating is specifically designed to allow for water drainage and a no-flex support. Weighing in at only 2.5 lbs per square foot, Deck Turf is the perfect compliment to our porcelain or Ipe pavers as a synthetic green area.

Specifications

1" Deep X 1 1/2" X 1 1/2" Mesh	3/4" X 3/4" Top Mesh
Corrosion Resistant	Load Bar Centers 1 1/2"
