

ECO ARBOR DESIGNS

Eco Arbor Designs

Outdoor Flooring Solutions

About our Company

Eco Arbor Designs was born from a simple concept, modular and removable outdoor flooring. The ability to cover existing surfaces with a new floor, without removing the existing floor underneath. 15 Years later and more than a million square feet of product installed of residential and commercial flooring. We now have our most robust portfolio of products to offer. Whether you are a residential client with a small balcony to a commercial plaza deck we have the solution and product on hand to supply and complete your project. Our goal has always been to be budget conscious, in stock with fast shipping as well as keeping with the latest trends in outdoor flooring design. Our passion and experience in outdoor floors is your advantage. We hope you take the journey with us in elevating your outdoor living space.

2cm Porcelain Pavers

2cm Porcelain Pavers

Porcelain Pavers offer a new low maintenance option for outdoor flooring. One of the most durable and maintenance free outdoor flooring solutions in the market today. Eco Arbor Designs is proud to offer over 45 colors and styles through 6 style collections. EarthStone, Mood Wood, Concrete, Quartz, Travertine and Terrazzo. With these collections we are able to elevate the level of outdoor flooring design to new levels. Our most common size is a square 24"X24" with 24"x48" additional sizes for every application. With these sizes come new thickness ability with the introduction of 3cm and even 5cm thickness for commercial applications where vehicular traffic is needed. Call us to learn more about our in stock collection and fast ship times. Use on Roof decks, plaza decks, balconies and ground level patios.

Can be installed on GROUND with thin set, sand bed, or raised pedestal application

STRUCTURAL Wood deck tiles

The Construction of Ipe wood decks has never been easier with our structural wood deck paver's. Install these paver's over uneven surfaces such as old concrete decks, sidewalks or patios without the need for expensive wood or steel framing. Structural wood deck pavers also keep the floor modular and removable so you can add or subtract square footage at any time or cover unsightly conduit . Perfect for raised pedestal decks they do not require any additional support backing as the tiles will withstand over 2500 lbs supported on each corner. Available in 24"X24" and 24"X48" as well as 24" X 72". Our wood pavers are made of the highest grade of certified lumber. The wood is unfinished and can be coated with an oil penetrating sealer or left to weather to a distinguished natural silver grey. Our wood pavers are available in a light Garapa wood color or a darker Ipe wood color.

Installation on pedestals, joist framing, sand bed or directly on waterproof surface with deck tile connectors

Deck Turf

Deck turf is an underlay solution for raised floors and allows the installer to use virtually any type material on top, whether it be artificial grass, tile or genuine stone. The FRP panels are elevated on pedestals and give a new floor height with the same durability as the ground itself. Perfect for adding additional drainage and air flow between the raised floor and the surface product. Our deck turf panels can be directly fastened to joists, or pedestals, or simply laid on a sand bed for maximum breath ability of your artificial turf. Made of 1" or 1.5" strong Fiber Re enforced Plastic these panels are sold in 24"X48" or 48"X96" sized panels. a lightweight and bulletproof solution for roof decks.

Interlocking Deck Tiles

ECO Decking tiles is where our company began over 15 years ago. The very first of our product line with three species of certified Bolivian hardwoods. Our interlocking series is well known as one of the most robust snap together flooring solution making them perfect for everything from events to permanent outdoor flooring. Used to quickly and easily transform any outdoor space. The self draining plastic mesh locks the tiles directly together on all sides with no nails, screws or tools needed. We are extremely confident this is the best snap together flooring you will find on the planet today. Available in two species Ipe and Garapa.

Applications: Balconies, covered decks, sun rooms, events restaurant patio flooring

Pedestal Systems

Our pedestal catalog is complete and created from years of trial and error, we have carried or sold them all over the years. Today we have designed and developed our own, essentially eliminating the snags and pitfalls of other brands. One model with overlapping height from one model to the next, a simple concept that is only found with our design. We offer three different types of pedestal systems as no one type is perfect for every application. Telescoping series, Fixed height series and our Hybrid series. We have the right model for your application at the right price.
